 - 2) Will result in an orderly and logical development pattern;

<APPLICATIONS FOR LARGE SCALE AMENDMENTS MUST ALSO INCLUDE THE ITEMS ON THE NEXT 2 PAGES>

Submit the following additional items only for Large Scale Amendment Applications:

14. Environmental Assessment - The environmental assessment must contain illustrations and text of the following:
- A. Hazardous Materials and Contamination
List and describe any known or suspected hazardous materials or contamination found on site. For example, any chemicals, containers, or historic dumping of trash, underground tanks, etc.
 - B. Soils
Utilizing the USDA Soil Conservation Service Soil of Walton County, briefly describe all soil types found onsite. Provide map showing soil types and extent of each found on the parcel.
 - C. Wetlands
Provide wetlands delineation and jurisdictional determination for wetland areas (i.e. Army Corps of Engineers, FDEP, or both). Include isolated wetlands. Indicate buffer/setback requirements pursuant to the DeFuniak Springs Land Development Code (30-feet from edge of wetland). Show these areas on site map or preferably aerial photos. An official binding jurisdictional letter from ACOE and/or FDEP may also be required.
 - D. Flood Zone(s) as identified by the Flood Insurance Rate Maps
 - E. Storm-water Management
Provide a description of the facilities that are in place, facilities that will be expanded, or new facilities that must be installed, including any public or private easements.
 - F. Other Environmental Characteristics:
 - 1) Natural Vegetative Communities: Upland and Wetland Utilizing Florida Natural Areas Inventory descriptions found in FNAI Guide to Natural Communities of Florida (2010), list and describe all Natural Community types on site, including actual species comprising each community based on your site visit. Provide approximate acreage of each and approximate extent/boundaries on site map. If possible, provide aerial photos with boundaries delineated.
 - 2) Uplands: Provide a description of all natural community types found on site and preservation requirements per comprehensive plan. Show these areas on site map.
 - 3) Threatened and Endangered Species: Request a Standard Data Report from Florida Natural Areas Inventory (www.fnai.org). Perform a site visit to look for any listed occurrences of threatened or endangered species or habitat. If listed species are determined to be present on site, provide a radius map and list of species occurring in vicinity of project. If listed species are present the environmental consultant may confer with staff, the Florida Fish and Wildlife Conservation Commission, and United States Fish and Wildlife Service. Summarize findings and method of site survey.
 - 4) Archaeological and Cultural and Historical Resources (if findings are documented on site.)
Conduct a review of the State of Florida Division of Historical Resources Master File for the presence of any known archaeological or cultural resources on site. Provide results in the form of a letter from the State Historic Preservation Office. If a review of the Master File indicates the presence of archeological, historical or cultural resources, a site visit and preliminary assessment must be conducted by a Florida Registered Professional Archaeologist. A summary of the findings and methodology must be included in the report.
 - G. Summarize Findings and Opinions of the Environmental Assessment.
15. Traffic Study (signed and sealed by Florida Registered Traffic Engineer or Certified Transportation Planner). The traffic impact analysis demonstrates projected impact to surrounding roads. The transportation consultant will reference the Transportation Concurrency Management System Methodology and Procedures as identified in the DeFuniak Springs Land Development Code for conducting the traffic analysis, indicated projected impact to surrounding roads. The traffic study will be reviewed by the city's engineering firm with a separate fee being charged. The traffic study shall also meet the following minimum technical requirements:
- A) An introduction and executive summary.
 - B) The proposed land development plan, if applicable, and access points.
 - C) Site location map that encompasses project traffic radius of influence.
 - D) Projected traffic based on peak direction/peak hour analysis and the latest edition of ITE Trip Generation Manual.
 - E) Trip distribution shall be distributed and assigned on all roadway segments within the Transportation Concurrency network until trips are distributed out to 5% of the adopted LOS service volume of the roadways or a ½ mile radius, whichever is the greater.
 - F) Schematic trip distribution drawing, which illustrates the project trip distributions and percentages within the projects radius of influence.
 - G) Evaluate the capacity of all roadway segments within the project radius of influence based on project traffic, background, and committed trips.
 - H) Summary and conclusion with respect to capacity evaluation and any potential future roadway improvements or mitigation which may be necessary upon a development order submittal to support the proposed future land use change.

16. Determine how the development will impact infrastructure and services listed below:

- A) Water Demand (calculate the demand based on projected usage and provider capacity-example provided below). Include a vicinity map showing the water service lines and sizes that service the site. Water demand projections are based on potential maximum number of dwelling units.

| Water Demand (gallons per day) | | | | | |
|--------------------------------|--------------------|----------------------|--------------------|--------------------------------|--------------------------------|
| Plant Capacity | Committed Capacity | Capacity Being Used | Capacity Remaining | Anticipated Demand of Project* | Anticipated Capacity Remaining |
| 2.4 mgd | 58,081 gal/day | 1.4 mgd (ave yearly) | 928,997 gal/day | (insert # of gal/day) | (insert # of gal/day) |

- B) Sewer Demand (calculate the demand based on projected usage and provider capacity-example provided below). Include a vicinity map showing the water service lines and sizes that service the site. Water and sewer demand projections are based on potential maximum number of dwelling units.

| Sewer Demand (gallons per day) ¹ | | | | | |
|---|--------------------|---------------------|--------------------|--------------------------------|--------------------------------|
| Plant Capacity ² | Committed Capacity | Capacity Being Used | Capacity Remaining | Anticipated Demand of Project* | Anticipated Capacity Remaining |
| .750 mgd | 58,081 gal/day | .600 mgd | 91,919 gal/day | (insert # of gal/day) | (insert # of gal/day) |
| Plant Capacity ³ | Committed Capacity | Capacity Being Used | Capacity Remaining | Anticipated Demand of Project* | Anticipated Capacity Remaining |
| 1.5 mgd | 58,081 gal/day | .600 mgd | .842 mgd | (insert # of gal/day) | (insert # of gal/day) |

Notes:

¹Water demand is assumed to be 1.1 times sewer demand, in most cases.

²Current plant capacity (data provided by utility provider)

³Planned plant capacity (under construction) (data provided by utility provider)

*Demand based on: maximum total dwelling units of the project; 2.35 persons per household; 100 GDP/per person)

- C) Amendment applications containing residential components must provide the following to determine the impact to Walton County's educational facilities:

- 1) Determine the impact by using the following formula:
 - a. Determine the type of residential development (single-family or multi-family).
 - b. Determine the number of proposed dwelling units.
 - c. Calculate the school impact by multiplying the total number of proposed dwelling units, times the 2016 Student Generation Multipliers, as shown in the table below, for each grade level (elementary, middle and high). Add the totals to determine the number of students generated by the proposed development.

| 2016 Student Generation Multipliers, North County | | | | |
|---|------------|--------|-------|-------|
| | Elementary | Middle | High | Total |
| Single-family dwellings | 0.211 | 0.090 | 0.105 | 0.406 |
| Multi-family dwellings | 0.215 | 0.087 | 0.123 | 0.425 |

- d. Present the information in the tabular format as illustrated in the following example.

| Example Table: Based on Multifamily Development with 590 DU's | | |
|---|----------------------------------|--|
| Grade Level | Walton County Student Multiplier | Multi-Family Development: 590 DU's (at buildout) |
| Elementary School (Grades K-5) | 0.215 | 126.85 |
| Middle School (Grades 6-8) | 0.087 | 51.33 |
| High School (Grades 9-12) | .123 | 72.57 |
| Total | | 250.75 |

Note: 2016 Student Generation Multipliers as provided by Walton County School District's Facility Planning Staff

- 2) Attach a letter from the Walton County School District Director of Operations and Administration indicating that the Director has reviewed the proposed amendment and finds that there no impacts anticipated. If impacts are indicated, the applicant must provide plans for mitigation. The City will submit a copy of the Applicant's Land Use Change request to the School District for a follow up report.
